CERTIFICATE OF COMPLIANCE– REACH-SVHC

This letter is to assure that the product(s) delivered by ITB Advanced Connectors do not contain any of the latest REACH Substances of Very High Concern (SVHC) per Europe Union (EU) Regulation 1907/2006. The latest substances restricted per the REACH Regulation were last updated on June 16, 2014. Please refer to the following for the most current candidate list of substances:

<http://echa.europa.eu/candidate-list-table>.

1. Necessary measures for Pre-registration/ registration:

According to REACH only substances have to be registered. The products delivered by ITB Advanced Connectors are, without exception, finished products according to the definition of the regulation, which do not need to be registered. In fact they cannot be registered.

As far as the substances used in the manufacturing of products supplied to your company are concerned, ITB Advanced Connectors, as a downstream user is dependent on the registration by the manufacturer or importer. This is why we have contacted our suppliers to make sure, that all substances as such and contained in preparations from our suppliers, are pre-registered in due time. If necessary, we will pre-register or register all our substances imported into the EU or produced by ITB Advanced Connectors. It is checked that all substances used in the ITB Advanced Connectors production process are pre-registered or registered.

2. Substances to be registered contained in products of suppliers

As a downstream user, there is no direct influence on whether suppliers submit substances, sold by them, for registration or not. Should a supplier inform ITB Advanced Connectors, that he intends not to register a specific substance despite an existing pre-registration, an alternative solution will be chosen and you will be informed in time.

3. Determination/ identification of the intended use:

The suppliers of ITB Advanced Connectors are informed about the intended use of the substances supplied to ITB Advanced Connectors. In addition, for economic reasons the suppliers are interested in a comprehensive identification of intended uses. There is no information that suppliers do not intend to identify the appropriate use when registering their substances.

Signature:  Date: 6 February 2015

This certification is subject to change without notice and supersedes any previous issue. The latest revision is available by contacting ITB Advanced Connectors.
