Further availability of AMC / MCH plug connectors secured

Dear Ladies and Gentlemen,

As promised, the HARTING Technology Group has taken your request to secure the future delivery of the AMC / MCH Plug connectors very seriously.

We are glad to inform you now, that ITB Precisiertechnik will overtake production and sales of that product line.

With this action, the AMC / MCH plug connectors will stay enduringly available to the market.

ITB Precisiertechnik (www.itb.nl) is an international oriented high tech company with sites in The Netherlands, Czech Republic and Mexico. The company is specialized in the design and production of technical precision parts, such as connectors.

- **Full compliance with former HARTING technology**
As ITB will overtake the production tools from HARTING, the product itself will stay unchanged from the technical point of view. The quality will be kept on the same stable and high level, which you are used by HARTING.
- **Sales channel**
ITB will exclusively overtake the marketing and sales activities.
- **Order information and part numbers.**
Please have new orders placed directly at ITB with immediate effect. For your convenience ITB has kept the former HARTING part numbers.

Please send your requests to:

amcmchconnector@itb.nl

- **HARTING phase out note**

Since all last time orders have been finished, HARTING now has phased out this product line with immediate effect.

If you have any further questions please contact ITB directly.

ITB and HARTING are working closely together, so that your very best support is guaranteed.

Yours sincerely
